# About Company

S.U.E. offers you a rapid metal machining service for custom production of prototype parts, unit parts, or small series (from 1 to 100+ parts). Our capabilities allow us to produce your functional metal parts on very urgent basis. This precision process is the best choice for prototyping and rapid production of small and large metal parts. You will receive high dimensional precision parts made from a wide choice of 'correct materials': [Aluminum machining](#), [Steel machining](#), [Stainless-steel machining](#), [Copper machining](#), [Monal 400 & K-500 machining](#), [17-4ph & 15-5ph machining](#), [Inconal 625/925 machining](#) etc. You can find a wide range of CNC turning and CNC milling machining services of Shree Umiya Enterprise. In machining: we have 2-axis turning center, 3-axis and indexed 4-axis CNC milling centers, conventional milling and precision welding: from prototype production to pre-series and series production is in all Questions of machining rely on us. We manufacture your precision custom parts and assembly according to your specification. We have most appropriate technique of CNC turning, CNC milling, drilling, boring, etc.

## CEO Profile

I, [CHAITANYA PATEL](#) am glad to tell you that we are committed to enhancing the value for our customers. There are some of the key features in achieving prosperity and success to any business. These are team work, honesty and mutual trust which we thrive to inculcate in S.U.E.

# Vision, Mission and Values

## Vision

Our main motive is to provide high quality services and meet customer expectations at all levels with adding the highly products services and technology.

## Mission

To provide the best products and services to enrich the customer experience with profitable operations.

## Values

- S - Simplicity -** We strive for clarity and consistency, make decision quickly and pragmatically and focus on what's essential.
- U - United -** Unitedly responsible towards the safety of our customers, employees society and environment.
- E - Experience -** We are committed to bold decision, take initiative, learn from our mistakes and see change as an opportunity.

## Why choose us?

In this era of cross changes competition, we determine the process that defines us! The process we follow is completely on ISO terms. We have our ever so happy suppliers as well as clientele. Apart from this, here are the reasons why one should choose us:-

01

Always put a benchmark in setting up the Designs and Production.

04

Above and beyond sales support

02

Hundred percent control over Production.

05

On-time Delivery

03

Hundred percent skilled technicians

# S.U.E. Providing Services in Sectors

**Oil and Gas Sector**

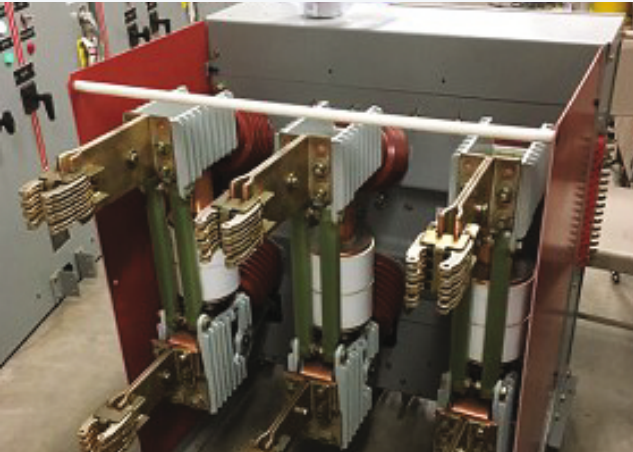

**Power Transmission**

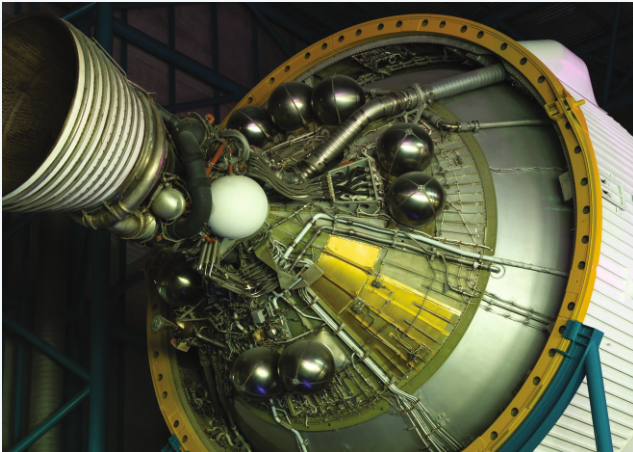

**Mining Sector**

**Switch Gear Industries**

**Aero Space Industries**

# Our Infrastructure & Manufacturing Facilities

## Product Drawing and Design Department

The first step towards any manufacturing part starts with its structure designing by the special team of S.U.E. All the parameters are confirmed and design on Computer systems with the help of special software and by the experienced designers. After doing the two step verification it is shared to the further department to start the manufacturing.

## Machining Department

CNC Turning machines are the backbone of S.U.E. These CNC Fully automated machines can work continually for 24X7. Each machine is handled by the special qualified Operators and supervisor. As of now S.U.E. have total 9 CNC turning Machines which are increasing every year.

CNC

VMC Milling machine is the main strength of S.U.E. The VMC gives us the best accurate and maximum number of production in limited time. Our clients are satisfied because of our Production Quality and On-Time Delivery. In our production process, we are highly skilled and focused on analyzing the design and clients expectations first. As of now we have 3 VMC milling machines.

VMC

## Quality Inspection Department

Giving you the best Quality is the major focus of S.U.E. Quality inspection is done by two different departments. First it is checked thoroughly as per drawings by the Quality Inspector on the production floor. Then in final inspection it is fully 100% visualized by the Visual Inspector and all dimensions rechecked 100% by final quality inspector as per the sampling plan and then proceed to Packing Department.

## Cleaning and Grinding Department

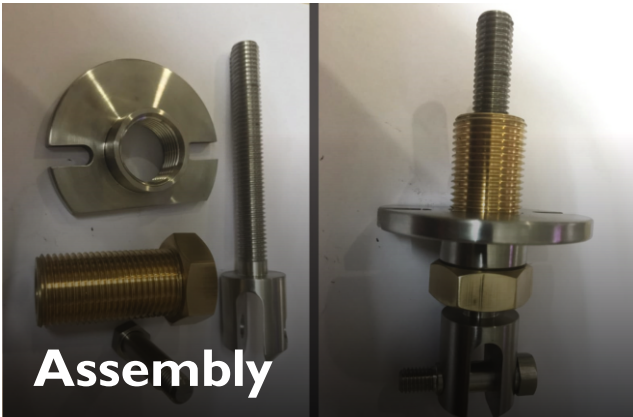

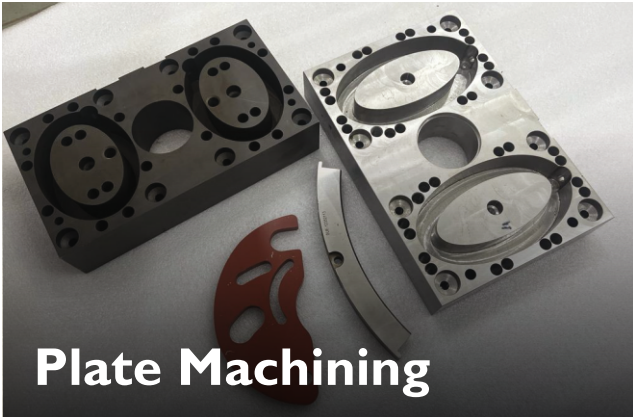

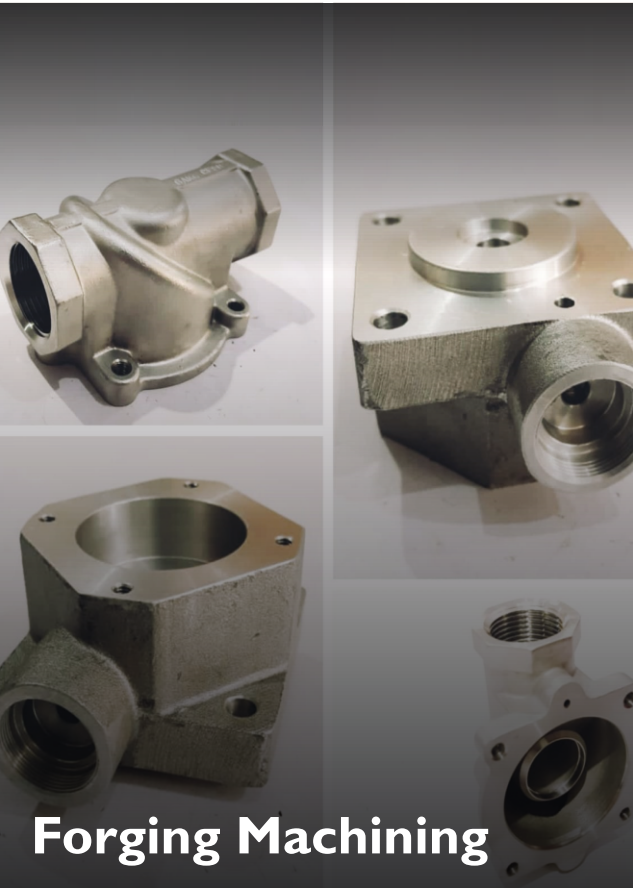

To remove the all sharp edges of products we are doing 100% debburing by help of Grinding and Lath machine. After that we wash the components and clean them with the help of special chemical liquids and cleaners. After this it is proceed to the final inspection department.

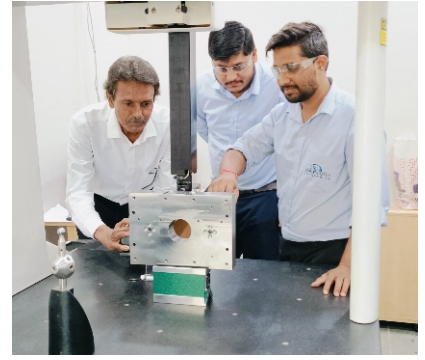

## Packing and Dispatch Department

It is S.U.E. responsibility to make his client products delivered safely and in very good condition. For the different types of products different packing methods are used in S.U.E. Such as Protected Sleeves ,VCI Bags, Form Sheet wrapping etc.. and if any special demand of customer we provide that too. For Global export we use high quality corrugated boxes and special wooden boxes.
